

Bryan Moffett

Salt Lake City, UT | (801)666-1298 | bryanmoffett.dev@gmail.com | [linkedin.com/in/bryanblaze](https://www.linkedin.com/in/bryanblaze) | github.com/BryanBlaze00

Software Engineer with 10+ years of technical experience architecting database solutions, automated ETL pipelines, and enterprise support infrastructure. Proficient in C#, C++, Java, Python, and SQL, with a foundation in cloud fundamentals and system administration. Proven record of cutting operational cycle times by up to 93% through targeted workflow automation.

Work Experience

LightSpeed DMS | *Tech Support Analyst III / Knowledge Base Manager / Data Analyst* | Full-Time | SLC, UT | Apr 2019 - Oct 2022

- Engineered automated SQL and Jira reporting pipelines, reducing repetitive manual reporting labor by 10% across support operations.
- Synthesized 100,000+ historical support resolutions into a searchable 5,000-article knowledge architecture, cutting issue resolution times by 15% and increasing query retrieval speed by 20%.
- Executed root-cause analysis and QA testing across escalated Jira queues of 100+ tickets, reducing defect recurrence and bolstering release stability.
- Resolved 30+ complex DMS technical escalations daily, sustaining 93% first-call resolution rate and 96% client satisfaction.
- Optimized cross-functional support workflows and stakeholder reporting, driving a 10% reduction in inbound ticket volume.

PC Laptops | *Senior Computer Technician* | Full-Time | SLC, UT | Aug 2007 - Aug 2016

- Resolved hardware, OS, and network incidents for 50+ clients weekly, diagnosing system failures across multi-vendor platforms.
- Diagnosed component-level failures and delivered targeted hardware repairs to secure a 92% first-time resolution rate.
- Overhauled workstation provisioning and data migration procedures across 1,000+ devices, reducing service time by 30%.

H&R Block | *Technical Support Helpdesk* | Seasonal | SLC, UT | Apr 2013 - Apr 2014

- Resolved 500+ critical software incidents for proprietary tax platforms under tight deadlines.
- Triage and resolved 30+ daily software, permission, and application faults via ticketing queues to ensure system uptime.
- Deployed remote diagnostic utilities to troubleshoot client systems, cutting MTTR by 20% and minimizing administrative downtime.

L-3 Communications | *Computer Maintenance Technician* | Contract | SLC, UT | Oct 2012 - Mar 2013

- Engineered and deployed custom batch scripts to streamline workstation imaging and deployment, increasing configuration efficiency by 15% across 1,000+ endpoints.
- Processed major software migrations for 300+ machines, mitigating user disruption and maintaining strict deployment schedules.
- Utilized Altiris, Active Directory, and PC-Inventory to manage assets, optimizing system tracking and configuration consistency.
- Implemented '5S Steps' methodology across technical storage and work areas, improving operational efficiency by 10% and reducing workflow downtime.

Microsoft | *Microsoft Help Desk Technician* | Contract | SLC, UT | Sep 2009 - Apr 2010

- Handled an average of 30 inbound technical escalations daily for Microsoft internal staff, resolving complex application and network issues under strict SLA deadlines.
- Improved issue tracking and resolution workflows by 15% with detailed ticket documentation and root-cause diagnostic reporting.
- Delivered tier-1/tier-2 software support across Windows NT and core Office Enterprise suites, ensuring high uptime and productivity for internal teams.

Technical Skills

- **Languages:** C#, C++, Python, Java, SQL, Bash / Shell Scripting, JavaScript, PHP, HTML5, CSS3
- **Cloud & Infrastructure:** Cloud Computing Fundamentals, AWS Essentials, Azure Services, Networking Protocols, Cloud Architecture, Virtualization, Serverless Concepts
- **Databases & Data Systems:** MySQL, Relational Database Management, Database Administration, SQL Scripting, Query Optimization, ETL Pipelines, Data Analytics, JSON / XML Parsing
- **Frameworks & Dev. Tools:** .NET Framework, REST APIs, Git, GitHub, Version Control Workflows, JIRA, Tableau, Salesforce, Slack
- **Engineering & QA Methodologies:** Object-Oriented Design (OOD), Software QA & Testing, Root Cause Analysis, Code Debugging, Systems Administration, Agile, Scrum, Technical Documentation

Education

Colorado State University Global | Jan 2022 - Dec 2027

- **Bachelor of Science** in Computer Science | GPA: 3.94
- **Undergraduate Certificate** in Computer Programming | GPA: 4.0 | Jan 2021 - Dec 2022

Academic & Technical Certificates

- CompTIA | Introduction to Career Skills in Software Development | 2026
- CompTIA | Learning Linux Command Line 2018 | 2026
- PMI | Lean Six Sigma Define and Measure Tools | 2026
- LinkedIn | MySQL Advanced Topics | 2026
- LinkedIn | Programming Foundations Data Structures | 2026
- LinkedIn | Programming Foundations Object Oriented Design | 2026
- LinkedIn | Python Data Structures and Algorithms | 2026
- LinkedIn | Software Design Modeling with UML | 2026
